PHROMPONG KHAGTES

[CHOPPER]

EDUCATION

2014 – 2018

BACHELOR DEGREE IN SOFTWARE ENGINEERING

GPA 3.03

Burapha University

SKILLS

PROGRAMMING LANGUAGES

- Typescript
- Javascript
- C#
- SQL
- HTML
- CSS
- PHP

FRAMEWORKS

- Angular
- NodeJS
- NestJS
- Next.js
- ReactJS
- ASP.NET
- React Native

DATABASE

- SQL Server
- MySQL
- PostgreSQL
- MongoDB
- Oracle

PROFILE

A Full Stack Developer with over 7 years of experience in software development, system architecture design, and database management. Skilled in software testing, debugging, and delivering reliable, high-quality applications. Experienced in maintaining systems and integrating new features into existing platforms to align with evolving business requirements.

EXPERIENCE

Jun 2024 - Present

Full Stack Developer

Bedrock Analytics

CDDP - Community Driven Development Project (GIS Platform for Local Government)

- Build full-stack GIS platform for local governments using NestJS, TypeORM, and PostgreSQL with PostGIS
- Implement interactive map visualization with React 18, TypeScript, and Mapbox GL (50+ dynamic layers)
- Design water management system with smart meter monitoring and DMA pipeline tracking
- Integrate AWS services (S3, SQS, Kinesis Video Streams) for storage, async processing, and CCTV
- Implement RBAC with SSO/JWT authentication and granular permissions
- Build data export system with SQS queue processing and scheduled cron jobs
- Manage frontend state with Zustand and TanStack React Query, styled with Ant Design and Tailwind CSS
- Deploy with Docker on Kubernetes (Helm), CI/CD via GitLab, monitoring via Sentry

Sep 2023 - Jun 2024

Senior Full Stack Developer

TN Incorporation Limited.

Sales system : Government Savings Bank

- Develop back-end microservices using Node.js, RabbitMQ, MongoDB, and SQL Server
- Design RESTful API specifications and database schema
- Implement sales pipeline features (lead tracking, target management, reporting)

Feb 2020 - Aug 2023

Full Stack Developer

PTT Digital Solutions Co.Ltd.

NEW POS : PTT Oil and Retail Business PCL (OR)

- Develop back-end microservices using Node.js, .NET, RabbitMQ, and Redis
- Develop front-end POS interface using ReactJS
- Design database schema and system workflow for POS operations
- Write functional test scripts using Mocha and conduct code reviews

Jul 2019 - Jan 2020

Programmer

Fusion Solution Co.,Ltd.

Cigna anywhere : Cigna Insurance PCL

- Develop back-end RESTful API using ASP.NET
- Design database schema and system workflow
- Implement insurance policy and claim processing features

Jun 2018 - Jun 2019

System Programmer

C.S.I. GROUP

Inventory management system : Panasonic Thailand

- Develop full-stack web app using ASP.NET, SQL Server, and Stored Procedures
- Implement inventory tracking (stock-in, stock-out, adjustment) with Crystal Report

Online request system : Yip In Tsoi Co., LTD.

- Develop full-stack web app using ASP.NET, SQL Server, and Stored Procedures
- Implement request submission, approval workflow, and status tracking

Product Line system : Teijin Polyester (Thailand) Limited.

- Develop full-stack web app using ASP.NET, SQL Server, and Stored Procedures
- Implement production line monitoring and performance reporting

OTHER

Schedule training management system : SEAC

- Develop back-end RESTful API using ASP.NET and MySQL
- Implement course registration, seat availability tracking, and multi-trainer scheduling
- Design database schema to support multi-course scheduling workflows

CCTV : AI FiRST

- Develop front-end using Angular and back-end using ASP.NET with MySQL
- Integrate AI-powered camera systems (Ashura, Yitu) for real-time video analytics
- Implement face detection and recognition features for surveillance monitoring

Smart city on cloud : AI FiRST

- Develop back-end services using Node.js and MySQL
- Integrate cloud-based AI services (Clarify, Ashura) for smart city data processing
- Implement APIs for IoT device data collection and real-time monitoring dashboard

Electronic Right Offering : Asia wealth securities company limited

- Develop back-end RESTful API using Node.js and MongoDB
- Develop front-end using ReactJS for electronic rights offering portal
- Implement shareholder rights subscription workflow and transaction management

Shipper System : Gulf Energy Development Public Company Limited

- Develop back-end using NestJS with MySQL
- Develop front-end using ReactJS for shipment management interface
- Implement shipment tracking, delivery scheduling, and logistics reporting

Medilance : Healthcare Freelance Marketplace

- Develop mobile app using React Native, Expo, and TypeScript with Zustand for state management
- Build interactive UI with React Native Paper, Bottom Sheet, and form handling with Formik/Yup
- Implement Google Maps integration with location-based job search and GPS check-in features
